WORKSHOP ON UTTAR PRADESH STATE SEPTAGE POLICY & USED WATER MANAGEMENT

BACKGROUND:

As a step towards achieving improved sanitation in urban areas of the state, the Urban Development Department of the GoUP has formulated “Uttar Pradesh State Septage Management Policy” (UPSSMP) which was approved by the Cabinet on 23 October 2019 in line with the National Policy on Faecal Sludge and Septage Management, 2017. This is a landmark resolve of the Government to improve the urban sanitation so as to achieve outcome levels impact on public health, environment quality and human dignity. The policy addresses much required guidance and directions to achieve the targets as laid out in the ODF++ and lends sustainability to the ODF status achieved under Swachh Bharat Mission (SBM) – Urban 2.0. On October 1, 2021 the Ministry of Housing and Urban Affairs (MoHUA), Government of India launched Swachh Bharat Mission-Urban 2.0. The aim of this mission is to make ODF sustainable (ODF++) and ensure 100% used water (wastewater) is treated for reuse. The SBM 2.0 emphasizes on Used Water Management with special focus of Faecal Sludge & Septage Management as a new component.

Nonetheless, stakeholders from ULBs may need help in deciphering the technical aspects of these Policy and operational guidelines. The referred Septage Policy and the Used Water Management component under SBM 2.0 have laid out clearly the implementation plan with time bound achievement of the targets. The workshops on Septage Management Policy and Used Water Management are a first step towards capacity building of all ULBs of Uttar Pradesh and implementation of this policy and SBM

2.0 guidelines. These workshops will inform all Municipal Bodies about the newly introduced policy and encourage them to prepare City Sanitation Plan for each of the ULBs and actively implement policy and SBM 2.0 initiatives in a timely and innovative manner.

Against this backdrop, RCUES, Lucknow organized 13, one day workshop on “Uttar Pradesh Septage Policy and Used Waste Management sponsored by Department of Urban, Government of Uttar Pradesh

OBJECTIVES:

- To acquaint the participants with the need, importance, and objectives of Used Water Management with special focus of Faecal Sludge & Septage Management as new component of SBM 2.0.
- To acquaint the participants with the need,

importance, and objectives of Uttar Pradesh State Septage Management Policy-2019.

- To aware the participants with City Sanitation Action Plan.
- To aware the participants with different types of Used Water Management System - On-site & Off-Site.
- To aware the participants with the Used Water Management Process – Containment/ Collection, Conveyance/Transportation, Treatment, and Disposal/Reuse.
- To highlight different technologies for Used Water Treatment with a comparative study of different technologies.
- To aware the participants with Faecal Sludge & Septage Management with special focus on Co-Treatment and additional methods.
- To aware the participants with Participatory Planning & IEC for effective Faecal Sludge & Septage Management.

PARTICIPANTS

The workshop was organized for Sanitary & Food Inspector/ Chief SFI, Engineer, Officials related to SBM, District Programme Manager and District Coordinator under SBM Cell. Overall 441 participants attended the workshops.

COORDINATION

The programme was coordinated by DrAnjuli Mishra, Joint Director and Dr Rajeev Narayan, Deputy Director, RCUES, Lucknow.

OPERATIONAL TRAINING ON INFANT, TODDLER AND CARE GIVER FRIENDLY NEIGHBORHOOD UNDER ITCN CAPACITY BUILDING PROGRAMME

PURPOSE & OBJECTIVE OF TRAINING:

The National Institute of Urban Affairs (NIUA), Government of India, New Delhi, established the 'Infant Toddler and Caregiver-friendly Neighborhoods (ITCN) Training and Capacity Building Programme' in collaboration with the Bernard van Leer Foundation (BvLF). The programme was created to assist in the development of city authorities' and young professionals' capacities for the development of young children and family-friendly communities in Indian cities. The task of conducting training and capacity building for ULBs officials and State Government officials has been assigned to RCUES, Lucknow.

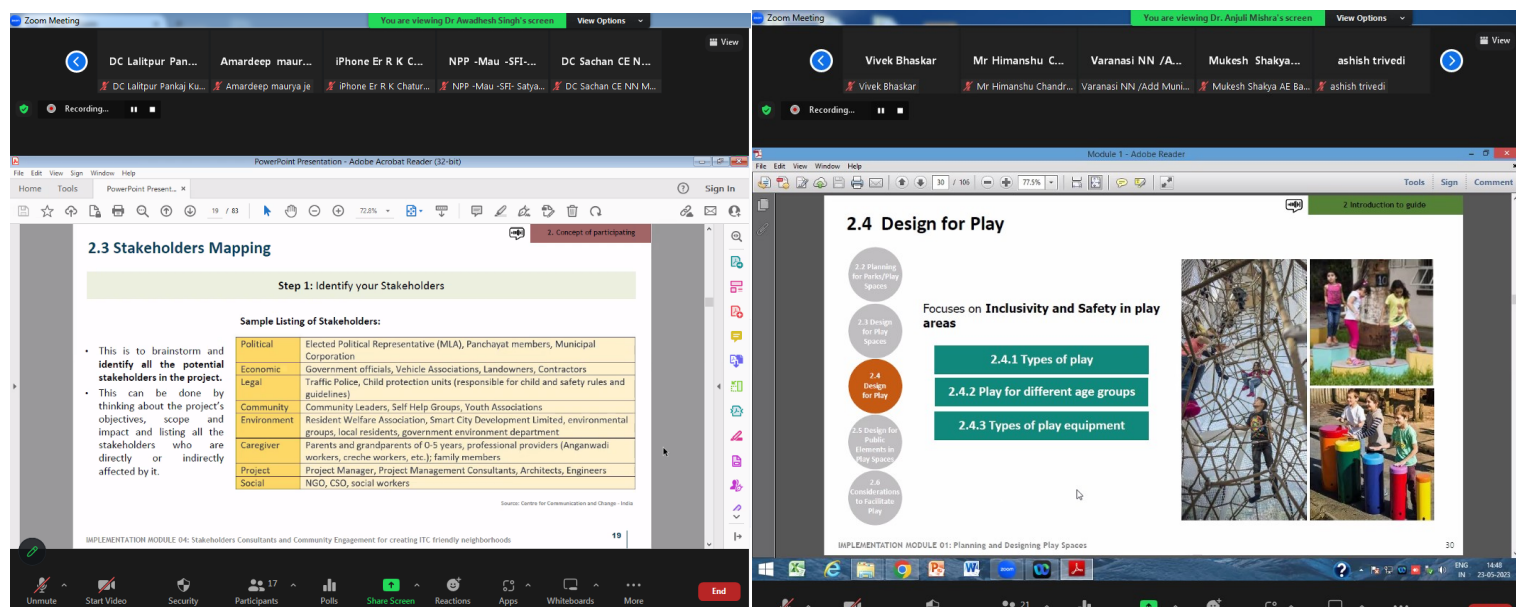

Babies and toddlers are the world's top learners, growing and learning at a breakneck pace before reaching their fifth birthday. Their brains develop at a faster rate than at any other point in life, and their experiences have a long-term impact on their physical and mental health, as well as their ability to learn and relate to others. One of the most crucial aspects of a healthy, peaceful, and creative society and country is a decent start for all children. The relationships that an infant or toddler has with the adults in their lives have the greatest impact on their development. These individuals are in charge of a child's safety and well-being, as well as what they eat and how they view the

world. They require proper nutrition and healthcare, as well as safety, time to play, and loving interactions with adults. Cities can be lovely places to grow up, but they can also present severe health and well-being difficulties for babies, toddlers, and their caregivers, ranging from a lack of natural and safe play spaces to air pollution and traffic congestion, as well as social isolation. The objective of the initiative is to ensure that cities scale the opportunities of safe, healthy and stimulating places—with opportunities to learn, create, imagine, play and grow—across all neighborhoods to reach as many families as possible. Against this backdrop, an Operational programme was organized by the Regional Centre for Urban and Environmental Studies, Lucknow on February 14-17, 2023.

PARTICIPANTS

Overall, 21 Municipal Officials from ULBs,

Department of Urban Development, Department of Housing and Urban Planning as well as Town & Country Planning organisation, Government of Uttar Pradesh participated in the programme.

COORDINATION

The Training was conducted jointly by Dr. Anjali Mishra, Joint Director, Dr. A. K. Singh, Assistant Director and Mr. Himanshu Chandra, Assistant Director, RCUES, Lucknow.

INTERNATIONAL WORKSHOP ON “PLASTIC WASTE MANAGEMENT” ON THE OCCASION OF WORLD ENVIRONMENT DAY

BACKGROUND

The environmental degradation and serious ecological imbalances are posing threat to mankind. The present development paradigms have posed a serious threat to environment and ecology, thus causing concern for sustainability of development. The environmental problems viz. global warming, destruction of ozone layer, extinction of species, loss of genetic diversity, deforestation, land degradation, acid rain, and deteriorating quality of urban environment are growing rapidly. Deforestation, unsustainable agricultural practices, tourists' inflow beyond carrying capacity and also development of infrastructure on the cost of environment and ecology are causing environment crisis. Growing urban population and anthropogenic activities have widely affected the urban environment and sustainability of natural resources.

World Environment Day is celebrated annually on June 5th since 1973 and it is an occasion that brings together people from all over the world to take action for the environment. Ministry of Environment, Forest and Climate Change, Government of India has announced that World Environment Day 2023 will be celebrated with a focus on the Mission LiFE, which stands for Lifestyle for Environment. The aim is to encourage people to adopt sustainable lifestyle practices to protect the environment. The concept of LiFE was introduced by the Prime Minister of India at the 2021 in United Nations Climate Change Conference (COP26) in Glasgow. He called for a global effort to adopt sustainable lifestyle practices, and since then, India has been mobilizing people to embrace LiFE. World Environment Day 2023 is hosted by Côte d'Ivoire and supported by the Netherlands and the theme will focus on solutions to plastic pollution under the campaign “Beat Plastic Pollution.” The changing lifestyle of humankind has caused concern as resources are depleting, degrading and adverse towards harmony with nature. Rapid expansion of urban areas present fundamental

challenges but there are also opportunities to restore ecological functions to design more liveable, healthy and resilient cities. Thus, it is imperative to bring transformative changes through policies, action and sustainable lifestyles towards clean, green and climate resilient cities. Against this backdrop, RCUES, Lucknow, in collaboration with Center for People & Environ (CPE), Bangladesh, Ecobricks Alliance, Indonesia, GFSRD, Malaysia, Global Centre for Rural Urban Linkages Studies, and CosmoMinds, India proposes to organize International Workshop on “Plastic Waste Management” on the occasion of World Environment Day 05 June, 2023.

PARTICIPANTS

The workshop was organized for Municipal Commissioners/ Additional Municipal Commissioners/ Deputy Municipal Commissioners/ Assistant Municipal Commissioners, Executive Offices, Engineers, Environmental Engineers, Engineers & Officials of State Pollution Control Board, Urban Planners of Development Authority, Academicians. Overall 60 participants attended the workshop.

OBJECTIVES OF WORKSHOP

- To highlight the policy and legal perspective of wastes management;
- To problems and challenges in plastic waste management;
- To find out suitable approaches and strategies for managing plastic wastes and its related pollution;
- To examine the interdependence of tourism and plastic waste;
- To discuss best practices and case studies on sustainable waste management.

COORDINATION

The programme was coordinated by Dr A K Singh, Assistant Director and Mr Himanshu Chandra,

Assistant Director, RCUES, Lucknow.

TRAINING PROGRAMME ON MANAGEMENT OF BIOSOLIDS IN ULBS

BACKGROUND

Around 65% of the urban population in India does not have access to sewerage network and is dependent on onsite sanitation systems (OSS), which generates tonnes of Fecal matter which further needs proper treatment.

With the launch of SBM, India's focus has drastically shifted to not only toilet construction but also Safe disposal and treatment of Fecal sludge so that it does not contaminate the environment.

The situation is no different in Uttar Pradesh, a state where state septage management policy was issued in 2019 and the state decided to implement FSTPs. With 3 FSTPs in force and around 59 new FSTPs and Co-treatment facilities in pipeline (as of 2021), UP's Fecal Sludge management journey has come a long way. A critical link in faecal sludge and septage management (FSSM) value chain is reuse of the by-products generated from FSTPs, which include treated water as well as biosolids. Manure is not the only resource which can be recovered from excreta. The faecal sludge also contains organic carbon that can be used to generate energy in the form of heat or electricity — the calorific value of faecal sludge is as high as many other commonly used organic fuels.

The reuse of biosolids or manure, has huge potential in agrarian states like Uttar Pradesh with the commissioning of various FSTPs being implemented in major cities in Uttar Pradesh.

With limited knowledge, nascent regulatory framework, and lack of awareness the issue of biosolid use has taken a backstage in case of India and particularly for Uttar Pradesh. With majorly an agrarian economy where farmers are largely dependent on fertilizers, biosolid use can make a great case for the state of Uttar Pradesh where these Biosolids may be spread over land for plant fertilization and soil conditioning and showcase a huge potential.

05-06 June, 2023	27
07-08 June, 2023	22

This resource recovery and reuse will help the ULBs in shifting the focus from waste being regarded as something to be disposed to waste being regarded as a valuable resource especially for farming and move towards a more circular economy. In this context, Regional Centre for Urban and Environmental Studies (RCUES) Lucknow successfully conducted two, Training Programmes on Management of Bio solids.

OBJECTIVES

The training aims to sensitize the officials on the importance of Biosolids, regulatory framework, quality controls in biosolids, existing international standards and framework, potential uses of biosolids, revenue generation.

SESSIONS

- Introduction to the Training- The session involved introduction of the participants and mapping their expectations from the training, introduction of Training schedule, knowledge mapping and training expectations,
- UP-FSSM Journey- issues, challenges, and success stories- This session discussed on Status of Fecal Sludge Management in Uttar Pradesh, UP-FSSM policy framework, Status of existing FSTPs and Co-treatment plants, Status of Proposed FSTPs and Co-treatment Plants, Issues of FSM in UP
- Circular economy in Water- Introduction to the concept of circular economy along with understanding the WICER regulatory framework.
- Introduction to Biosolids- introduction to the concept of Biosolids, its characteristics, Components of biosolids- useful and harmful. The session will also include Importance of biosolids- farm use, climate change. Soil rejuvenation and Importance of Biosolids in UP context
- Regulatory framework for Biosolid use- introduction and understanding of the Regulatory framework for

Biosolid use worldwide, its application and relevance in Indian context

- Field visit – Visit to STP and farmland using Biosolids. Field visit to Daulat Ganj 56 MLD sewage treatment plant to understand its functioning and the generation of Biosolids and aspects of its use in the area
- Treatment methods for biosolids- Discussion on the various treatment methods for Biosolids including Heat, Chemical, Storage and Incineration. With case studies, this also included a detailed discussion on the various treatment options available like Heat, Chemical, Storage and Incineration
- Waste to energy from biosolids- introduction and understanding how waste can be converted to energy in the form of biosolids , discussion on the various processes like Anaerobic digestion, pyrolysis, Omni processor
- Biosolids usage in agriculture- the various uses of biosolids in agricultural purposes, context of Uttar Pradesh in terms of Agrarian economy, monitoring mechanism for biosolid use and management etc
- Biosolids management- Discussion on the Monitoring the application of biosolids, Sampling and testing, transportation of biosolids, pollutant loading rates
- Revenue generation models in Biosolids- Understanding of the various Revenue generation models in Biosolids worldwide and in India using case studies
- Roles and responsibilities of Officials- introduction and understanding of the Roles and responsibilities of Officials for biosolid use and management
- Inclusive Sanitation- Sensitizing the officials on roles of all genders in the society, especially women and in work space and in planning of projects

PARTICIPANTS

The workshop was organized for Assistant Engineer , DPM/ District Coordinator, Executive Engineer/ Executive Officer, JE and Sanitary Inspector. Overall 49 participants attended the workshop.

COORDINATION

The programme was coordinated by Mr Ajit Mishra, Assistant Director, RCUES, Lucknow.

ORIENTATION TRAINING PROGRAMME UNDER AMRUT 2.0 FOR UTTARAKHAND OFFICIALS

BACKGROUND

AMRUT 2.0 is a step towards AatmaNirbhar Bharat with aim of making the cities 'water secure' and providing functional water tap connections to all households. This will be achieved through circular economy of water by effecting water source conservation, rejuvenation of water bodies and wells, recycle/ reuse of treated used water, and rainwater harvesting by involving community at large. This Mission will be run as people's program i.e. Jan Aandolan. Mission also targets to provide 100% sewage/ septage management in 500 AMRUT cities. Mission will focus on empowering States/ UTs and cities for efficient implementation of projects in the spirit of cooperative and competitive federalism by providing flexibility to the States/ UTs to formulate, plan and implement the projects. CA released can be utilized for projects in any of the ULBs as per physical/ financial progress of the projects. In this context, Regional Centre for Urban and Environmental Studies (RCUES) Lucknow successfully conducted the 3 day Orientation Training Programme under Atal Mission for Rejuvenation and Urban Transformation 2.0 for municipal functionaries of Uttarakhand state from 19th to 21st June 2023 at Lucknow.

OBJECTIVES

The three days training was designed to enhance the functional knowledge and improve the job-related skills for effective implementation of the scheme. The programme was designed to orient the participants with AMRUT 1.0 achievements and give a broad overview of AMRUT 2.0, to acquaint the participants with admissible Elements of Projects, Reforms Agenda to be achieved and different Action Plans to be prepared under AMRUT 2.0.

Over the course of three days the programme focused on the city level strategies for Recycle & Reuse of Treated Used Water and City level action plan for Rejuvenation of Water Bodies (including Urban Wetland) & Creation of Green Spaces and Rain Water Harvesting, discuss about Pey Jal Survekshan toolkit to ascertain equitable distribution of water, reuse of wastewater and mapping of water bodies and to prepare the ULB officials for undertaking Survekshan.

PARTICIPANTS

A total of 22 officials from Uttarakhand Urban Development Directorate, Uttarakhand Peyjal Nigam and Uttarakhand Jal Sansthan participated in the training programme.

COORDINATION

The Training was conducted jointly by Dr. Nasruddin,

and Mr Himanshu Chandra, Assistant Director, RCUES, Lucknow.

ONLINE TRAINING ON PROJECT MANAGEMENT, CONTRACT MANAGEMENT & PUBLIC PRIVATE PARTNERSHIP

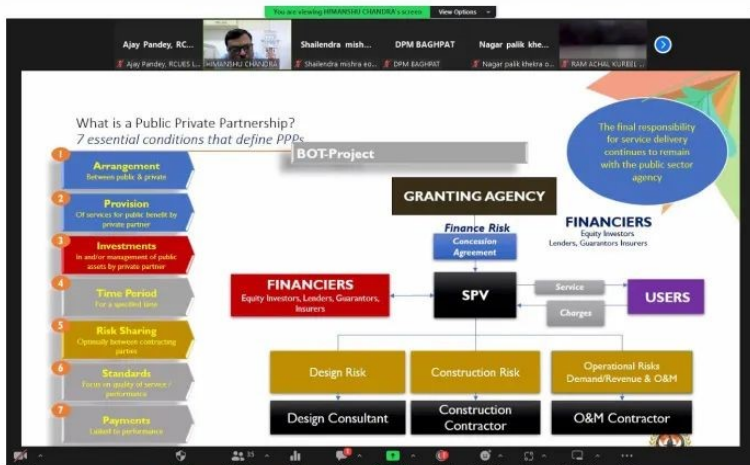

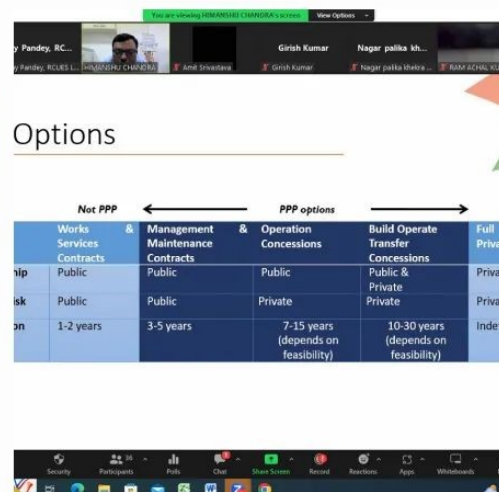

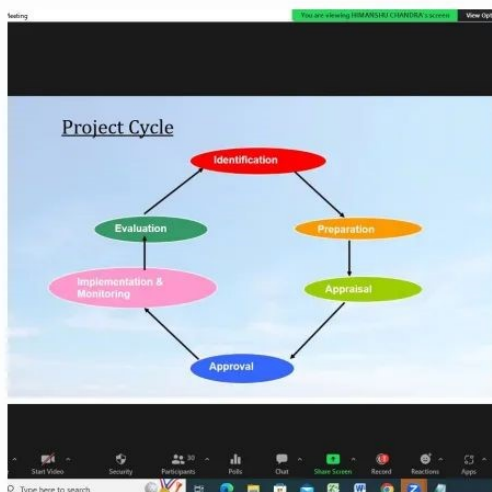

BACKGROUND

Urban India has grown by nearly five times during the last fifty years, while the population of India has grown two and half times in the same period. India's Urban Population grew from reported 290 million in Census 2001 to an estimated 340 million in 2008. This process of urbanization has created a huge gap between demand and supply of urban services and infrastructure.

Contract Management is important throughout the entire process of the contract cycle and not just at award process, effective contract management will bear dividends for both employer and contractor to ensure a well-managed agreement in practical and logistical terms. Contracts, the foundation to every business relationship, are a legally binding agreement

between the parties identified in the agreement to fulfil all the terms and conditions outlined in the agreement. A prerequisite requirement for the enforcement of a contract, amongst other things, is the condition that all the parties to the contract accept the terms of the claimed contract. One who is in charge of the project is known as the Employer. One who agrees to execute or perform is known as the Contractor.

Project management is the application of processes, methods, skills, knowledge and experience to achieve specific project objectives according to the project acceptance criteria within agreed parameters. Project management has final deliverables that are constrained to a finite timescale and budget. A project manager is the person responsible for leading a project from its inception to execution. This includes planning, execution and managing the people, resources and

scope of the project.

Rapid urbanization and growing demand has increased the need for investment in infrastructure development. Limited availability of funds for the provision of infrastructure has widened the divide between requirements and supply. The investment requirement far exceeds the availability of budgetary allocation. The government therefore has been encouraging PPPs to attract market investment, thereby leveraging government budgetary resources to meet the provisions for infrastructure.

Against this view point, Regional Centre for Urban and Environmental Studies (RCUES), Lucknow, under the auspices of Ministry of Housing and Urban Affairs, Government of India, New Delhi organized an Online workshop on Project Management, Contract Management and Public Private Partnership for the Municipal Officials, Urban Planner and Urban Infrastructure Expert of Urban Local Bodies on 24th June 2023.

OBJECTIVES

- To discuss and deliberate on emerging issues and challenges in planning for infrastructure development projects and their implementation.
- To discuss the criterion and parameters for project formulation in the field of water supply, Sewerage, SWM and urban transportation
- To discuss the desirable contents in DPRs and essential characteristics of Project development cycle.
- To discuss the procedures and legal issues in contract management.

PARTICIPANTS

The workshop was organized for Executive Office, Sanitary & Food Inspector, Environmental Officer, Sub Engineer, Urban Planner, Urban Infrastructure Specialist, Dy. Quality Manager, Executive Engineer. Overall 30 participants attended the workshop.

COORDINATION

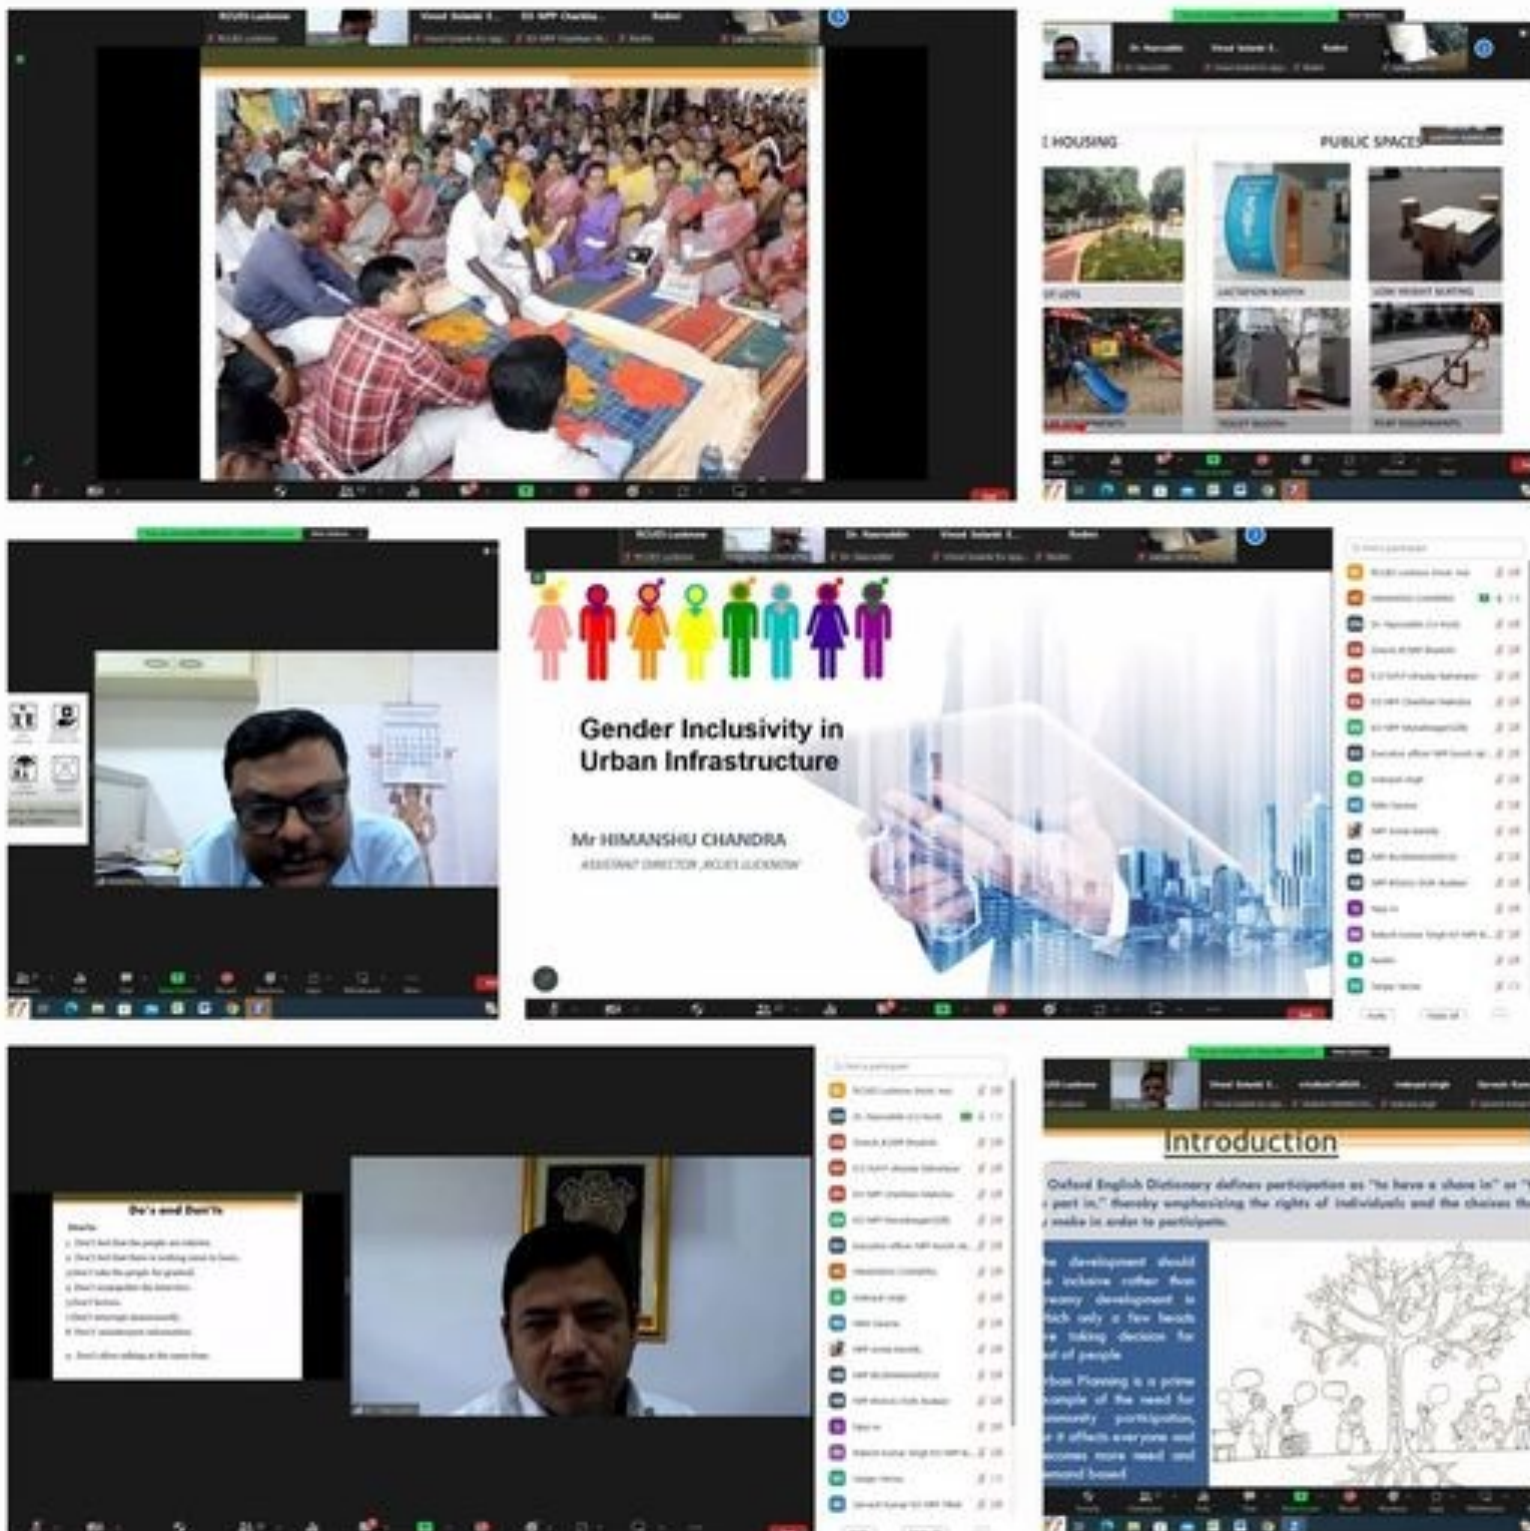

The programme was coordinated by Mr Himanshu Chandra, Assistant Director, RCUES, Lucknow

ONLINE WORKSHOP ON GENDER INCLUSIVE PARTICIPATORY PLANNING & DECISION MAKING

BACKGROUND

The issue of engendering development and women empowerment has been in the central stage with the shifting of paradigm of development and governance at the global level and particularly in India. Gender

budgeting has emerged as an important instrument for gender mainstream and women empowerment across the globe. It has been well recognized by the policy makers and feminist economists that gender budgeting is imperative for gender equality and engendering development planning.

List of Training

Date	No of Participants
26 June, 2023	18
27 June, 2023	20

Gender budgeting refers to the systematic examination of the budget programmes and policies for the impact on women. Studies show that programmes and policies design to improve women's economic opportunities lead to higher rates of economic growth.

Gender budgeting has gained prominence in the policy circles in the recent years. In view of the growing importance of the gender budgeting, the present study purports to critically review the plans, policies, programmes and schemes and also to examine union budgets through gender lens. In 1984, Austria introduced the first gender budget. Taking budgets as essential instruments for promoting gender equality, pioneering analysis of the impact of public budgets on gender relations was carried out. Since then, more than 90 countries have adopted gender budgeting as a tool for women empowerment and engendering development. In India too, many states, local governments, corporate houses and private agencies have initiated gender budgeting and have introduced specific policies, programmes and schemes for gender mainstreaming. In view of the above, two Online workshops on Gender Inclusive Participatory Planning & Decision Making.

Objectives of Workshop:

- To review the rationale of the gender budgeting as a tool for women empowerment and also to discuss strategic framework of gender budgeting activities;
- To examine the policy initiatives, programmes, schemes and projects for gender mainstreaming and gender inclusive urban development in India;
- To discuss the tools of gender budgeting at state level and also share experiences of different states;
- To examine the problems, constraints and difficulties in gender budgeting at different levels;
- To discuss the role of various stakeholders and key players in gender budgeting;
- To examine the scope of gender budgeting in different sectors of economy, particularly in departments and ministries of centre and state governments;

- To suggest measures for empowering women and gender budgeting exercises.

PARTICIPANTS

The workshop was organized for Executive Officer, Junior Engineer, Office Superintendent & Computer Operator. Overall 38 participants attended the Training.

COORDINATION

The programme was coordinated by Dr Nasruddin Assistant Director, RCUES, Lucknow

SOCIAL AUDIT OF PRADHAN MANTRI AWAS YOJANA – URBAN (PMAY-U)

Centre has been assigned the task of conducting Social Audit of PMAY Mission in the selected Municipality of Uttar Pradesh by State Urban Development Agency, Govt. of UP.

Urbanization is critical to the development of the country. Uttar Pradesh is the most populous state in the country, accounting for 16.4 per cent of the country's population. In order to overcome the urban issues and challenges, the government has shifted its focus on management rather than administration and has launched multiple schemes to facilitate urban renewal and development. Housing is an important aspect of living of human beings. As housing constitutes an important element of human life. It has potential to contribute to significantly in national income. It also accelerates the pace of development. Investments in housing have a multiplier effect on income and employment. Against this backdrop, social audit has been carried out to assess the social impact of housing project of 2017-18, completed under PM Housing for All (Urban) in Bakshi ka talab, Faizabad, Gorakhpur, Varanasi, Kanpur, Prayagaraj, Lakheempur, Ghaziabad, Agra district in the state of Uttar Pradesh.

The audit was jointly conducted by Dr. Anjuli Mishra, Joint Director and Mr Ajit Kumar Mishra, Assistant Director, RCUES, Lucknow.

STAFF NEWS

Er A K Gupta, Additional Director, RCUES Lucknow attended the 6th Asian Cities Summit and Mayors' Forum in New Delhi, on 5-7 April 2023 organised by ALL INDIA INSTITUTE OF LOCAL SELF-GOVERNMENT (AIILSG). The theme of the conference was 'Inclusive and Resilient Cities'. He attended the summit as a delegate. The summit was endorsed and supported by the Ministry of Housing and Urban Affairs (MoHUA) and it is a part of the series of events organized under U20.

COLLABORATIONS

MoU signed between Odisha Urban Academy (OUA) and RCUES Lucknow on 26/04/23 at AAETI, Nimli, Rajasthan.

U'khand officials visit Bharwara STP

A team of officials from Uttarakhand visited Asia's largest Bharwara sewage treatment plant in Gomtinagar on Tuesday. They also participated in a technical presentation providing information about the functioning of the STP. The visit aimed to enhance the understanding of STP operations. The officials also got an opportunity to learn about maintaining environmental sustainability.
